

a) Avez-vous bien compris?

- 1 The MSF staff find it difficult to wear the protective clothing for longer than 40 minutes at a time. Why do you think this is?
- 2 Why is a person's name written on the apron?
- 3 What do the MSF staff have to do before entering the high-risk zone of the treatment centre?
- 4 The high-risk zone has two separate areas and caters for two different types of patients. What is the difference between them?
- 5 Which type of patients are seen first on the ward round?
- 6 What happens when staff leave the high-risk zone?
- 7 How long does it take to do a lab test to confirm Ebola?
- 8 How do the MSF staff try to make the high-risk zone more comfortable?
- 9 What else do they do to try to offer some comfort to patients who have Ebola?
- 10 When is a patient considered cured?
- 11 What happens before cured patients leave the treatment centre?
- 12 Why is it not always easy to return home? What additional support is provided to the patient and to the community?
